Experience

Director of Student Experience @ CodeDay **2025-08 to Present**
Remote (Seattle, Washington)

formerly **Head of Software Engineering Education** **2024-12 to 2025-08**
formerly **Consulting Software Engineer** **2023-10 to 2024-12**

- Manage, train, and hire for a team of 6 consulting software engineers
- Design, deliver, and maintain kickoff presentations for an internship-style program that have dramatically improved interns’ awareness of resources
- Conduct novel, federally-backed research on program outcomes
- Co-develop organizational strategies for AI use and alumni engagement
- Helped interns make 40+ code contributions to 10+ open-source projects
- Assisted interns with 100s of novel software engineering challenges by teaching them relevant skills

Lead Engineer @ New Sun Rising (MHCI Capstone) **2026-01 to 2026-07**
Pittsburgh, Pennsylvania

- Implemented a novel, AI-powered ingestion mechanism for a web application that helps non-profits find and win grant opportunities
- Developed a formula for assessing grant relevance based on 13 heuristic factors and controlled by 21 hyperparameters
- Architected a comprehensive data type schema to ensure code extensibility
- Leveraged Claude Code and other AI tools to accelerate development
- Supported numerous user research and UX design processes throughout

Lead Front-End Engineer @ Nebula Labs **2023-01 to 2023-05**
Richardson, Texas

- Co-architected a novel account and identity access management system
- Designed UIs for two front-end microservices and implemented one of them

Software Engineering Intern @ Cvent, Inc. **2022-06 to 2022-08**
Remote (Dallas, Texas)

- Wrote 3 novel REST API endpoints and deployed them to production
- Authored 20+ unit tests, integration tests, and automation tests
- Reduced technical debt by investigating issues with several existing integration tests and presenting findings
- Improved internal documentation by correcting outdated information and creating new diagrams and resources

Software Engineering Intern @ Onfleet, Inc. **2021-05 to 2021-08**
Remote (San Francisco, California)

- Fixed a bug in a software-as-a-service (SaaS) web application that caused phone numbers to be displayed incorrectly
- Migrated a complex Single-Page Application (SPA) from Angular.js to React and added dozens of unit tests

Education

Master of Human-Computer Interaction
Carnegie Mellon University
2025-08 to 2026-07

B.S. in Computer Science
University of Texas at Dallas
2019-08 to 2023-05

Graduated *summa cum laude* w/ additional major (CS^2) and university (Collegium V) honors

Key Skills

React, Next.js, TypeScript, JavaScript, Java, Python

Figma, Notion, GitHub, Jira

Information Architecture, Diagramming, Documentation, Problem Solving, Mentorship

AI Interaction Design

Certifications

AWS Cloud Solutions Architect
Coursera, 2023-09-01

Seal of Biliteracy in Spanish
State of California, 2019-06-06

Honors

Valedictorian
Homestead High School, Cupertino, California, 2019-06-06

National Merit Scholar
National Merit Scholarship Corporation (NMSC), 2019-02
